

CONSTRUCTION FINISH WORKER

Growing company looking for a top-level and enthusiastic construction finish worker to join our production/installation team immediately. We offer excellent benefits, opportunities for promotion, and bonuses for outstanding performance. The ideal candidate will be someone who is willing to take on increasing degrees of responsibility and can travel on a frequent basis for periods of time ranging from two to eight weeks. Applicants must be willing to meet at I-5 Design & Manufacture in Lacey, Washington for interview.

ESSENTIAL JOB DUTIES AND RESPONSIBILITIES

- Installs or assists in installing sub-flooring and flooring; constructs inner and outer walls on buildings; installs siding, windows, and exterior doors; installs or replaces roofing; builds rafters and/or sets trusses.
- Renovates, installs, or assists in installing plumbing, electrical, and heating and cooling systems in buildings; installs sinks, toilets, showers, water heaters, and other fixtures.
- Paints buildings and other structures using sprayers, brushes, or rollers; installs paneling, wallpaper, drywall, ceramic tile, and other interior finishes.
- Performs finish carpentry such as installation of millwork; constructs boardwalks, stairs, and platforms.
- Operates a motor vehicle; operates heavy equipment such as a forklift.
- Exercises independence in the performance of responsibilities; receives general administrative direction; assignments may be accompanied by blueprints, penciled layouts, or sketches; work is reviewed while in progress and upon completion through inspections.
- Performs other related work as assigned and assists onsite superintendent with overall supervision of project and any needed tasks.

REQUIREMENTS

- Ability and willingness to travel for periods ranging from two to eight weeks at a time.
- Good knowledge of general construction and repair methods, materials, and equipment used in building construction.
- Good working knowledge of safety requirements as it relates to OSHA requirements and the proper use of tools, when performing work.
- Ability to interpret and work from sketches, penciled layouts, and blueprints.
- Ability to communicate effectively.
- Ability to perform manual work requiring heavy lifting, reaching, and bending.
- Ability to operate a variety of hand/power tools.
- Ability to operate a motor vehicle.
